

**Module: Secure Networked Control Systems**

<b>Level</b>	Master	<b>Short Name</b>	SNCS
<b>Responsible Lecturers</b>	Oliver Stecklina, Prof. Dr.		
<b>Department, Facility</b>	Electrical Engineering and Computer Science		
<b>Course of Studies</b>	Applied Information Technology, Master		
<b>Compulsory/elective</b>	Elective	<b>ECTS Credit Points</b>	5
<b>Semester of Studies</b>	2	<b>Semester Hours per Week</b>	4
<b>Length (semesters)</b>	1	<b>Workload (hours)</b>	150
<b>Frequency</b>	WiSe	<b>Presence Hours</b>	60
<b>Teaching Language</b>	German/English	<b>Self-Study Hours</b>	90

The following section is filled only if there is **exactly one** module-concluding exam.

<b>Exam Type</b>	Oral Exam	<b>Exam Language</b>	German/English
<b>Exam Length (minutes)</b>	30	<b>Exam Grading System</b>	
<b>Learning Outcomes</b>	<p>After successfully completing the course, students will be able to:</p> <ul style="list-style-type: none"> <li>• explain the basic terms of network security and classify them in the area of industrial control systems,</li> <li>• structure attack techniques and name possible countermeasures,</li> <li>• analyze and evaluate industrial systems with regard to possible weaknesses and vulnerabilities,</li> <li>• evaluate and implement countermeasures for industrial control systems taking into account the fields of application, and</li> </ul> <p>integrate reactive and preventive IT security measures into industrial control networks.</p>		
<b>Participation Prerequisites</b>			

The previous section is filled only if there is **exactly one** module-concluding exam.

<b>Consideration of Gender and Diversity Issues</b>	<ul style="list-style-type: none"> <li>✓ Use of gender-neutral language (THL standard)</li> <li>✗ Target group specific adjustment of didactic methods</li> <li>✓ Making subject diversity visible (female researchers, cultures etc.)</li> </ul>
<b>Applicability</b>	The module can be used within the master of computer science.
<b>Remarks</b>	

## Module Course: Secure Networked Control Systems (Lecture)

(of Module: Secure Networked Control Systems)

<b>Course Type</b>	Lecture	<b>Form of Learning</b>	Presence
<b>Mandatory Attendance</b>	no	<b>ECTS Credit Points</b>	3
<b>Participation Limit</b>		<b>Semester Hours per Week</b>	3
<b>Group Size</b>		<b>Workload (hours)</b>	90
<b>Teaching Language</b>	German/English	<b>Presence Hours</b>	45
<b>Study Achievements ("Studienleistung", SL)</b>		<b>Self-Study Hours</b>	45
<b>SL Length (minutes)</b>		<b>SL Grading System</b>	

The following section is filled only if there is a course-specific exam.

<b>Exam Type</b>		<b>Exam Language</b>	
<b>Exam Length (minutes)</b>		<b>Exam Grading System</b>	
<b>Learning Outcomes</b>			
<b>Participation Prerequisites</b>			

The previous section is filled only if there is a course-specific exam.

<b>Contents</b>	<p>With the introduction of Industry 4.0, the security of networked control systems is becoming increasingly important. Such a system can only be effectively used by a company in an industrial environment if the data generated by the system is reliable or it can be guaranteed that commands to the system will arrive unaltered and will also be executed as required.</p> <p>The module deals with possible scenarios that arise with the increasing networking and autonomy of systems and gives solutions to install security in such a system or to develop secure systems,</p> <p>Part 1: Basics of network security</p> <ul style="list-style-type: none"> <li>• Basic terms of IT security</li> <li>• Attacks and countermeasures in communication networks</li> </ul> <p>Part 2: Information Security Management Systems (ISMS)</p> <ul style="list-style-type: none"> <li>• Safety Analysis</li> <li>• Security Management</li> </ul> <p>Part 3: Industrial control technology</p> <ul style="list-style-type: none"> <li>• Basics</li> <li>• Security Analysis</li> <li>• Attack Models</li> </ul> <p>Part 4: Preventive and reactive safety in industrial control technology</p> <ul style="list-style-type: none"> <li>• Firewalls</li> <li>• Intrusion detection</li> </ul>

## Module Course: Secure Networked Control Systems (Practical Training)

(of Module: Secure Networked Control Systems)

<b>Course Type</b>		<b>Form of Learning</b>	Presence
<b>Mandatory Attendance</b>	no	<b>ECTS Credit Points</b>	2
<b>Participation Limit</b>		<b>Semester Hours per Week</b>	1
<b>Group Size</b>	12	<b>Workload (hours)</b>	60
<b>Teaching Language</b>	German/English	<b>Presence Hours</b>	15
<b>Study Achievements ("Studienleistung", SL)</b>	Practical Training	<b>Self-Study Hours</b>	45
<b>SL Length (minutes)</b>		<b>SL Grading System</b>	Pass

The following section is filled only if there is a course-specific exam.

<b>Exam Type</b>		<b>Exam Language</b>	
<b>Exam Length (minutes)</b>		<b>Exam Grading System</b>	
<b>Learning Outcomes</b>			
<b>Participation Prerequisites</b>			

The previous section is filled only if there is a course-specific exam.

<b>Contents</b>	In this practical training, the knowledge of the lecture should be deepened in practical examples. Be in group work <ul style="list-style-type: none"> <li>• Network protocols of industrial control systems will be analyzed,</li> <li>• Network filter will be set up, and</li> </ul> Procedures for secure patch management will be implemented.
